📁 PROFESSIONAL EXPERIENCE

Oct 2024 – present
Hyderabad, India

Microsoft ☑

Software Engineer 2

- Drove Copilot integration to enhance business productivity, delivering AI-powered labor log suggestions with **~30% faster log completion**, skill-based resource recommendations that improved allocation efficiency by **25%**, and an AI-driven ticket resolution system that reduced average resolution time by **40%** by learning from historical on-call tickets.
- Redesigned and migrated the platform from REST APIs to GraphQL using .NET (HotChocolate), optimizing schema design for **up to 60% reduction in data-fetch latency**, improving developer iteration speed by **35%**, and enabling more efficient data access patterns. **Enabled field-level access policies**, improving data security and compliance by restricting sensitive field visibility based on user roles and permissions.
- Led the architecture and deployment of Azure-based cloud infrastructure (Web Apps, Function Apps, Event Grid, Service Bus, Cosmos DB), achieving **99.99% uptime** and scaling to handle **3× higher peak loads** with no service degradation.
- Designed and developed high-performance distributed systems using CQRS with Azure Cosmos DB and SQL, implementing event-driven architectures with Azure Event Grid to process **millions of events daily in real-time** and automate critical workflows, reducing manual intervention by **60%**.

Dec 2021 – Oct 2024
Hyderabad, India

Arcesium (The D. E. Shaw group) ☑

Senior Software Engineer

- Transformed a monolithic service into **microservices** architecture, establishing multiple services and delivering a 70% reduction in latency.
- Developed multiple **data pipeline processors** to make data mobility easy for high data volume applications.
- Developed **react based UI application** for newly developed application. Owned end to end. Coordinated with product for design and requirements.

Software Engineer (12/2021-06/2022)

- Developed PnL process generator and made capable enough to handle **high volume** data.
- Created several **report generators** that operate with low latency, leveraging a high-volume data source and intricate computational processes.
- Implemented **asynchronous booking flow**, contributing to a 30% boost in system efficiency and a 25% improvement in responsiveness.

Jun 2021 – Dec 2021
Hyderabad, India

Navtech ☑

Senior Software Engineer

- Developed **invoice generation** feature for deliverables, showcasing proficiency in developing key functionalities.
- Implemented a **background job** mechanism to automate the initiation of emails and the export of order details in various formats.
- Elevated the **performance** of numerous **stored procedures**, **optimizing** the generation and creation of deliverables for a more streamlined and efficient workflow.

Jul 2019 – Jun 2021
Pune, INDIA

JPMorgan Chase & Co

Software Engineer

- Designed and implemented a **data migration** application that leverages encryption services for securing user data during asynchronous migration. The system also supports batch migration, achieving an impressive performance rate of **50,000** records per minute.
- Lead the development of an invoicing feature within the booking workflow, utilizing an **Actor System** for seamless integration and enhanced efficiency.
- Developed a **booking feature**, allowing users to book hotels and cars while seamlessly redeeming loyalty points for an enriched user experience.

SDE Intern (07/2019-06/2020)

- Successfully conceptualized and implemented a Proof of Concept (POC) for a database solution encompassing both **SQL and NoSQL** technologies, tailored to meet product requirements.
- Significantly improved the accuracy of existing API logs, resulting in a noteworthy **30% reduction** in false exception alarms, showcasing a keen focus on precision and error mitigation.

EDUCATION

2016 – 2020
Mohali, India

Bachelor Of Engineering

Chandigarh University 

SKILLS

FRAMEWORK

.NET Core, Spring Core, Spring Boot, React

Cache

Redis, Hazelcast

Infra

Kubernetes, Docker, App Service, Container App

Languages

C++, C#, JAVA, Kotlin, TypeScript

Queue

RabbitMQ, Kafka, SQS

Azure

Web App, Function App, Event Grid, Service Bus, Cosmos, Azure Search, Data Pipeline, Azure AI Foundry

Database

SQL Server, PostgreSQL, Cassandra, MongoDB, CosmosDB

AWS

S3, LAMBDA, SQS

AWARDS

First Prize – Mathematics Olympiad

Won **first place** in the Mathematics Olympiad at my College Hackathon, showcasing strong problem-solving skills.

Multiple Kudos & Shoutouts

Recognized multiple times for **exceeding project expectations, meeting tight deadlines, and delivering high-quality solutions** in a fast-paced environment.

CERTIFICATES

- SnackDown 2019 Qualification Certificate
- Algorithm Specialization Certificate
- MongoDB Certified
- Cassandra Certified
- Java Certification from IIT-Bombay
- C# Certification from Udemy
- Microsoft Certified: Azure
- Microsoft Certified: Azure AI Fundamentals
